DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-32, 33, and 34, drawn to a drive mechanism having an outlet chamber adjacent a coil, classified in class 604, subclass 131.
- II. Claim 35, drawn to a method of delivering infusion medium including forming a piston chamber between a piston and valve member classified in class 604, subclass 500.
- III. Claims 36-40, drawn to a drive mechanism having a magnetic return path, classified in class 417, subclass 417.
- IV. Claims 41-49, drawn to a drive mechanism having an adjuster, classified in class 604, subclass 141.
- V. Claims 50-55, drawn to a clearance between a piston and piston channel sufficient to convey a piston chamber between coil activations, classified in class 604, subclass 151.
- VI. Claims 56-61, drawn to a drive mechanism having a magnet arranged to impart a force on an armature or piston upon deenergization of a coil, classified in class 604, subclass 152.
- VII. Claims 62-68, drawn to a drive mechanism having a valve assembly moveable between open and close in response to axial movement of a piston, classified in class 604, subclass 246.

The inventions are distinct, each from the other because of the following reasons:

Art Unit: 3763

Inventions I, II, III, IV, V, VI, and VII are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, the separate inventions have separate utility such as using the distinctive elements as described above. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Species

This application contains claims directed to the following patentably distinct species of the claimed invention: species 1 drawn to Figs. 3, 4, species 2 drawn to Fig. 11, species 3 drawn to Fig. 13, species 4 drawn to Figs. 14, 15, species 5 drawn to Fig. 16, species 6 drawn to Fig. 17, species 7 drawn to Fig. 18, species 8 drawn to Fig. 19, species 9 drawn to Fig. 20, species 10 drawn to Fig. 21, species 11 drawn to Fig. 22, species 12 drawn to Fig. 23A, and species 13 drawn to Fig. 23B.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Art Unit: 3763

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

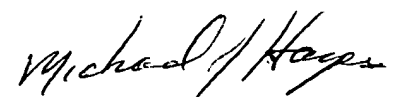

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Hayes at (703) 305-5873. The examiner can usually be reached Monday -Thursday, 7:00-4:30, and on alternate Fridays. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Brian Casler, can be contacted at (703) 308-3552. The fax number for submitting official papers is (703) 872-9302. The fax number for submitting after final papers is (703) 872-9303.
